## FEATURES & BENEFITS

**Modern Endpoint Security** – Enjoy protection from online and offline threats and block the spread of malware to other users. This endpoint security prevents, detects and resolves security incidents.

**Safe Banking** – This functionality features a secured browser mode, offering automatic protection when banking online and accessing web-based crypto wallets. Communication between the keyboard and browser is also encrypted, ensuring safer transactions and protection from keyloggers.

**Safe Browsing** – Safeguard your online activities with a secured browser mode. This functionality offers an additional layer of browsing protection, defending against malware, keylogging and other types of digital threats. It is automatically activated for all compatible browsers.

**Browser Privacy & Security** – A browser extension for elevated security and privacy. Easily distinguish between safe and unsafe search results. Stay protected from phishing websites and other threats. Clear your browser data on demand or automatically, reducing digital clutter and optimizing browser efficiency.

**Webcam Protection** – This functionality monitors your computer for attempts to use your webcam. It alerts you to unexpected attempts and allows you to block them—a simple way to boost your privacy.

**Network Inspector** – Test your home router for vulnerabilities, such as weak passwords or out-of-date firmware. This functionality provides an easy-to-access list of connected devices and allows you to scan smart devices for vulnerabilities. Users also receive suggestions for how to resolve security issues.
